

## Add wonderful Dimension to Computerized Embroidery, Machine Satin Stitches and Free-Motion Satin Stitching.

Add flair, 3-dimension and excitement to your designs!

Puffy Foam is a high quality Ethylene Vinyl Acetate Film that is made specifically for use on home sewing machines. It is non-toxic, water-resistant and machine washable, but it is flammable and cannot be dry-cleaned. It comes in two thicknesses for different stitching effects, and there is virtually no waste because even very small pieces can be used.

Puffy Foam is available in 12 colors to match your thread color. It perforates cleanly when stitched through, and makes the stitching stand well above the fabric. It is being widely seen commercially in headgear and washable wearables. Look for special computerized embroidery cards made especially for Puffy Foam from your favorite sewing machine company.

**Note:** Puffy Foam works best on designs that feature a satin stitch edge or underlay techniques that will perforate the foam prior to stitching the top layer. Not all machines and/or design cards are appropriate for both weights of Puffy Foam. Do a test sample before applying to finished project.
